## PROFESSIONAL EXPERIENCE

---

### Software Engineer Intern

CodeLinker [↗](#)

This is a six-month internship incorporated in my undergrad program. Have worked on the front end of a web project from the second day utilizing technologies such as ReactJS, AntD, Redux, etc.

09/2021 – 02/2022  
House 11/13, Road 5,  
Block C, Banasree  
Dhaka, Bangladesh

## EDUCATION

---

### B.Sc.(Eng.) in Software Engineering

Shahjalal University of Science and Technology [↗](#)

2017 – 2023  
Kumargaon, Sylhet-  
3114, Bangladesh

### Higher Secondary Examination

Chowgacha Govt. College [↗](#)

2015 – 2016  
Chowgacha, Jashore,  
Bangladesh

## SKILLS

---

**Language** (Javascript, Typescript)

**Web development** (HTML, CSS, ExpressJS, ReactJS, NextJS, Ant Design, Redux, TailwindCSS, BootStrap, Prisma)

**Database** (MongoDB, MySQL)

## PROJECTS

---

### EdTech [↗](#)

EdTech is a web application that aims to connect students and teachers simply and intuitively.

Features

- RBAC
- Users can view course videos
- Users can submit assignments and take part in quizzes.
- Users can track progress in the dashboard and get an idea of how others are doing by visiting the leaderboard.
- Admin can add course resources and give assignment marks for the submitted ones.

**Technologies:** Nextjs, Redux toolkit, RTK Query, Ant Design, React Player, Express, Mongoose, Joi, Nodemailer, Swagger, etc.

### Docapp [↗](#)

This doctor appointment app allows users to book an appointment with a doctor. It also allows doctors to manage their appointments. It is built with Nodejs, Express, MongoDB, and React. It is a monolithic application. The frontend is built with React and the backend with Nodejs and Express. The database used is MongoDB.

Features:

- Users can book an appointment with a doctor.
- Users can view their works.
- Users can apply for a doctor's position.
- Doctors can view their patients and appointments.
- Doctors can generate a PDF of their appointments.
- Admin can accept/reject doctors' account requests.

**Technologies:** Reactjs, Redux toolkit, RTK Query, Ant Design, Chartjs, Express, Mongoose, express validator, Nodemailer, etc.

## CERTIFICATES

---

- Learn with Sumit - Think in a Redux way [↗](#)
